Education

Amrita Vishwa Vidyapeetham Expected May 2028
B.Tech in Computer Science and Engineering — ***CGPA: 8.3***

Experience

Bluestock Fintech Pvt. Ltd. April 2026 – June 2026
Data Analyst Intern

- Designed ETL pipelines processing 46,000+ NAV records and 32,000+ investor transactions using Python and Pandas.
- Built normalized star-schema databases and financial analytics workflows using SQL and SQLAlchemy.
- Developed Power BI dashboards and 15+ visualizations for fund performance and investor analytics.
- Computed Sharpe Ratio, Sortino Ratio, Alpha, Beta, VaR and Maximum Drawdown metrics.
- Analyzed mutual fund performance against Nifty 50 and Nifty 100 benchmarks to optimize reporting workflows.

Projects

Realtime Collaborator | *Next.js, Node.js, FastAPI, PostgreSQL, Prisma, Yjs, Docker* | Live Demo

- Built a real-time collaborative editor using CRDTs (Yjs) and WebSockets for concurrent multi-user editing.
- Designed a microservices architecture and integrated Gemini-powered AI content generation workflows.
- Implemented secure backend workflows using OAuth, JWT, and Role-Based Access Control (RBAC).
- Containerized application infrastructure utilizing Docker, deploying to Vercel and Render.

CensusGrid | *React, Node.js, PostgreSQL, Prisma, Redis, Stripe* | Live Demo

- Built a geographic developer platform serving 457,000+ village records through secure REST APIs.
- Designed structured PostgreSQL schemas and implemented schema-first development for robust data management.
- Developed analytics systems, API key management, and seamless developer onboarding workflows.
- Implemented Redis caching for performance optimization and Stripe for subscription management.

Movie Intelligence Engine | *Python, ChromaDB, Sentence Transformers* | GitHub

- Built an AI-powered recommendation engine using ChromaDB, transformer embeddings and semantic search.
- Implemented HNSW indexing, hybrid retrieval and metadata filtering for scalable recommendations.
- Designed structured data preprocessing pipelines using Pandas and NumPy for feature extraction.

Open Source & Community

Contributed to iCalendar (RFC 5545 compliance) and OpenAlgo (webhook APIs, Python strategy integrations).

Selected Contributor driving feature development for GirlScript Summer of Code (GSSoC) 2026.

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, C, SQL
Frameworks: React, Next.js, Node.js, Express.js, Django, FastAPI
Databases: PostgreSQL, MySQL, MongoDB, Prisma, ChromaDB, Firebase, SupaBase
Tools: Redis, Docker, Git, Power BI, Postman, Vercel, Render
Concepts: REST APIs, Microservices, OAuth, JWT, RBAC, Database Design, System Design

Achievements

Special Mention — Hack 101 Hackathon

Participant — Intel IoT Hackathon
